

## **ABSTRACT**

### **CEILING FAN DISPLAY**

The ceiling fan display comprises a stand having a vertical support with a horizontal support base extending from the bottom of the vertical support, and a horizontal support arm extending from the top of the vertical support. The ceiling fan is disposed at the distal end of the horizontal support arm. The horizontal support base is comprised of structural members that extend outward from the vertical support to form a "T" shaped outline. Boxes of the displayed ceiling fans may be stacked on the horizontal support base as a part of the sales display.
